Official Journal of the International Society of Nephrology

Le Journal de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

The clinical significance of inhibition of renal prostaglandin synthesis. *Carlo Patrono and Michael J. Dunn* 1

LABORATORY INVESTIGATION

Removal of subepithelial immune complexes with excess unaltered or cationic antigen. *Lawrence Y.C. Agodoa and Mart Mannik* 13

Glomerular hemodynamics and hormonal participation on cyclosporine nephrotoxicity. *Elvino J.G. Barros, Miriam A. Boim, Horatio Ajzen, Oswaldo L. Ramos, and Nestor Schor* 19

Micropuncture localization of kallikrein secretion in the rat nephron. *Debbie Beasley, Narendra B. Oza, and Norman G. Levinsky* 26

Procoagulant activity in kidneys of normal and bacterial lipopolysaccharide-treated rabbits. *Jorge Brukman and Roger C. Wiggins* 31

Acetate relaxation of isolated vascular smooth muscle. *John T. Daugirdas and Zeenat M. Nawab with the technical assistance of Smita Jain and Mark Klok* 39

Contribution of the urea appearance rate to diuretic–induced azotemia in the rat. *Donald E. Kamm, Lawrence Wu, and Barbara L. Kuchmy* 47

Glomerular epithelial cell, polyanion neutralization is associated with enhanced prostanoid production. *Francesco Pugliese, Ashok K. Singh, Balakuntalam S. Kasinath, Jeffrey I. Kreisberg, and Edmund J. Lewis* 57

Human glomeruli release fatty acids which stimulate thromboxane synthesis in platelets. *Josee Sraer, Claude Wolf, Jean–Paul Oudinet, Marcelle Bens, Raymond Ardaillou, and Jean–Daniel Sraer* 62

CLINICAL INVESTIGATION

Renal selectivity properties towards endogenous albumin in minimal change nephropathy. *Gian Marco Ghiggeri, Giovanni Candiano, Fabrizio Ginevri, Rosanna Gusmano, Maria Rosa Ciardi, Francesco Perfumo, Gerolamo Delfino, Carla Cuniberti, and Carlo Queirolo* 69

Reduction of proteinuria by angiotensin converting enzyme inhibition. *Jan E. Heeg, Paul E. de Jong, Gjalt K. van der Hem, and Dick de Zeeuw* 78

Blood–membrane interaction in hemodialysis leads to increased cytokine production. *Anton Luger, Josef Kovarik, Hans–Krister Stummvoll, Agatha Urbanska, and Thomas A. Luger* .. 84

"High–dose" calcitriol for control of renal osteodystrophy in children on CAPD. *Isidro B. Salusky, Richard N. Fine, Hooshang Kangarloo, Richard Gold, Luc Paunier, William G. Goodman, Judith E. Brill, Giulio Gilli, Eduardo Slatopolsky, and Jack W. Coburn* 89

Aluminum–related osteomalacia: Response to reverse osmosis water treatment. *George D. Smith, Robin J. Winney, Alexander McLean, and James S. Robson* 96

Glomerular deposition of cross–linked fibrin in human kidney diseases. *Tsukasa Takemura, Kazuo Yoshioka, Norihisa Akano, Hiroyuki Miyamoto, Kazumi Matsumoto, and Sunao Maki* 102

Epidemiology of idiopathic glomerular disease: A prospective study. *Anton T.M.G. Tiebosch, Johannes Wolters, Peter F.M. Frederik, Theo W.M. van der Wiel, Ewald Zeppenfeldt, and Peter J.C. van Breda Vriesman, with the technical assistance of Henk van Rie* 112

Table of contents

EDITORIAL REVIEW

Role of peritoneal cavity lymphatic absorption in peritoneal dialysis. *Robert A. Mactier, Ramesh Khanna, Zbylut J. Twardowski, and Karl D. Nolph* 165

LABORATORY INVESTIGATION

Chronic renal failure after nephrotoxic nephritis in rats: Contributions to progression. *A. Meguid El Nahas, Sarah N. Zoob, David J. Evans, and Andrew J. Rees* 173

Prostaglandin-E_2 receptors in the rat kidney: Biochemical characterization and localization. *Erik F. Eriksen, Bjoern Richelsen, Balbola P. Gesser, Niels O. Jacobsen, and Kristian Stengaard-Pedersen* 181

Viscoelastic properties of tubule basement membranes in experimental renal cystic disease. *Jared J. Grantham, Vicki S. Donoso, Andrew P. Evan, Frank A. Carone, and Kenneth D. Gardner, Jr.* ... 187

Mechanism of furosemide resistance in analbuminemic rats and hypoalbuminemic patients. *Masayasu Inoue, Kenji Okajima, Kazunobu Itoh, Yukio Ando, Nobukazu Watanabe, Tatsuomi Yasaka, Sumi Nagase, and Yoshimasa Morino* 198

$1,25(OH)_2D_3$ Receptors and endorgan response in experimental aluminum intoxication. *Jürgen Merke, Philip A. Lucas, Andras Szabó, Frank Helbing, Ulrike Hügel, Tilman Drüeke, and Eberhard Ritz* 204

Tubuloglomerular feedback in animals with unilateral, partial ureteral occlusion. *Peter Morsing, Arne Stenberg, Charlotte Müller-Suur, and A. Erik G. Persson* 212

The kinetics of ultrafiltration during peritoneal dialysis: The role of lymphatics. *Karl D. Nolph, Robert Mactier, Ramesh Khanna, Zbylut J. Twardowski, Harold Moore, and Terry McGary* 219

Down modulation of Heymann's nephritis by mercuric chloride. *Lucette Pelletier, Marthe Galceran, Régine Pasquier, Pierre Ronco, Pierre Verroust, Jean Bariety, and Philippe Druet* 227

Renal anaphylaxis. I. Antigen-initiated responses from isolated perfused rat kidney. *Eduardo Pirotzky, Guillem Pintos-Morell, Claude Burtin, Jane Boudet, Jocelyne Bidault, and Jacques Benveniste* 233

Glomerular filtration effects of acute volume expansion: Importance of chloride. *Donald E. Wesson, with the technical assistance of Bettye K. Walters, Mary A. Dudek, and Ernest Pace* 238

Glomerular hemodynamics in mercury-induced acute renal failure. *Allen I. Wolfert, Leigh A. Laveri, Katherine M. Reilly, Keith R. Oken, and Donald E. Oken* 246

CLINICAL INVESTIGATION

A kinetic study of cation transport in erythrocytes from uremic patients. *Dalila B. Corry, David B.N. Lee, and Michael L. Tuck* 256

Morphometric aspects of reflux nephropathy. *Mahmoud T. El-Khatib, Gavin J. Becker, and Priscilla S. Kincaid-Smith* 261

Effect of dialysate composition on intercompartmental fluid shift. *Simon J. Fleming, James S. Wilkinson, Roger N. Greenwood, Colin Aldridge, Laurence R.I. Baker, and William R. Cattell* 267

The prognosis of segmental glomerulonephritis in systemic lupus erythematosus. *Melvin M. Schwartz, Karen S. Kawala, Howard L. Corwin, and Edmund J. Lewis* 274

Contents continued on next page

Enhanced fibrinolysis caused by tissue plasminogen activator release in hemodialysis. *Wolfgang Speiser, Johann Wojta, Christian Korninger, Johannes C. Kirchheimer, Jan Zazgornik, and Bernd R. Binder* 280

Cellular and non-cellular compositions of crescents in human glomerulonephritis. *Kazuo Yoshioka, Tsukasa Takemura, Norihisa Akano, Hiroyuki Miyamoto, Takahiro Iseki, and Sunao Maki* . 284

NEPHROLOGY FORUM

HUS and TTP: Variable expression of a single entity. *Giuseppe Remuzzi* 292

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 309

Awards and Grants 310

KIDNEY INTERNATIONAL

Volume 32, Supplement 21

Proceedings of the International Symposium on Water Metabolism

Festschrift, 600th Anniversary of the University of Heidelberg

November 1985, Heidelberg, Federal Republic of Germany

Table of contents

Introduction. *Peter Gross and Eberhard Ritz* S-1

Cellular handling of water. *Eberhard Frömter* S-2

Vasopressin biosynthesis—from gene to peptide hormone. *Hartwig Schmale, Susanne Fehr, and Dietmar Richter* S-8

Anatomical basis of thirst and vasopressin secretion. *Earl A. Zimmerman, Li-Yun Ma, and Gajanan Nilaver* S-14

Physiology of ADH secretion. *Gary L. Robertson* S-20

Thirst and the renin–angiotensin system. *Johannes F.E. Mann, Alan Kim Johnson, Detlev Ganten, and Eberhard Ritz* S-27

Brain mechanisms and drinking: The role of lamina terminalis–associated systems in extracellular thirst. *Alan Kim Johnson and J. Thomas Cunningham* S-35

The renal concentrating mechanism. *Rex J. Jamison* S-43

Morphological aspects of the action of ADH. *Richard M. Hays, Guohua Ding, and Nicholas Franki* S-51

Cellular events in vasopressin action. *Maurice Abramow, Renaud Beauwens, and Elie Cogan* S-56

The charted and the uncharted waters of hyponatremia. *Peter A. Gross, Markus Ketteler, Christian Hausmann, and Eberhard Ritz* S-67

Vasopressin antagonists: Present and future. *Karl G. Hofbauer and Seng Chin Mah* S-76

Hormonal regulation of water metabolism in children with nephrotic syndrome. *Wolfgang Rascher and Tivadar Tulassay* S-83

Effects of aging on vasopressin secretion, water excretion, and thirst in man. *John G.G. Ledingham, Morgan J. Crowe, Mary L. Forsling, Paddy A. Phillips, and Barbara J. Rolls* S-90

Fluid metabolism in exercise. *Hans Köhler* S-93

Impaired fluid and electrolyte balance in hot climates. *Ori S. Better* S-97

Physiology of sweat secretion. *Paul M. Quinton* S-102

Transport processes in the eccrine sweat gland. *Jan Bijman* S-109

Water metabolism in historical perspectives: Its research in the past and present. *Robert W. Schrier and Jin K. Kim* S-113

Table of contents

EDITORIAL REVIEW

Cellular calcium in ischemic acute renal failure: Role of calcium entry blockers. *Robert W. Schrier, Patricia E. Arnold, Vicki J. Van Putten, and Thomas J. Burke* 313

LABORATORY INVESTIGATION

Renal response to metabolic alkalosis induced by isovolemic hemofiltration in the dog. *Steven Borkan, Thomas E. Northrup, Jordan J. Cohen, and Serafino Garella* 322

Endotoxin provocation of experimental renal cystic disease. *Kenneth D. Gardner, Jr., William P. Reed, Andrew P. Evan, Julianne Zedalis, Mark D. Hylarides, and Alberto A. Leon* 329

Effect of dietary lipids on renal function in rats with subtotal nephrectomy. *Michael Heifets, Jeremiah J. Morrissey, Mabel L. Purkerson, Aubrey R. Morrison, and Saulo Klahr* 335

Participation of the myeloperoxidase-H_2O_2-halide system in immune complex nephritis. *Richard J. Johnson, Seymour J. Klebanoff, Rex F. Ochi, Stephen Adler, Patricia Baker, Louise Sparks, and William G. Couser* 342

Diminished parathyroid $1,25(OH)_2D_3$ receptors in experimental uremia. *Jürgen Merke, Ulrike Hügel, Andrezej Zlotkowski, Andras Szabó, Jürgen Bommer, Gerhard Mall, and Eberhard Ritz* ... 350

Cathepsin B and L in nephron segments of rats with puromycin aminonucleoside nephrosis. *Christoph J. Olbricht, James K. Cannon, and C. Craig Tisher* 354

Effect of immunosuppressants on OKT3 associated T cell activation: Clinical implications. *Manikkam Suthanthiran, Michael E. Wiebe, and Kurt H. Stenzel* 362

CLINICAL INVESTIGATION

Serum apolipoprotein profile of patients with chronic renal failure. *Per-Ola Attman, Petar Alaupovic, and Anders Gustafson* 368

Lithium clearance during the paradoxical natriuresis of hypotonic expansion in man. *W. H. Boer, Hendrik A. Koomans, and Evert J. Dorhout Mees* 376

Role of growth hormone in the amino acid–induced acute rise in renal function in man. *Raimund Hirschberg and Joel D. Kopple* 382

Serum magnesium level and arterial calcification in end–stage renal disease. *H. Erik Meema, Dimitrios G. Oreopoulos, and Abraham Rapoport* 388

Transluminal angioplasty of venous stenoses in polytetrafluoroethylene vascular access grafts. *Steve J. Schwab, Mohsin Saeed, Steven K. Sussman, Richard L. McCann, and Delford L. Stickel* . 395

Comparison of hemodialysis and hypertonic hemodiafiltration on cardiac function. *Koon K. Teo, Carlo Basile, Raymond A. Ulan, Maxine D. Hetherington, and Tissa Kappagoda* 399

NEPHROLOGY FORUM

Immunopathogenesis of crescentic glomerulonephritis and lung purpura. *David J. Salant* 408

KIDNEY INTERNATIONAL

Volume 32, Supplement 22

Proceedings of the Fourth International Congress
on Nutrition and Metabolism in Renal Disease
Williamsburg, Virginia, USA, 1985

Table of contents

Introduction. *Joel D. Kopple, James Winchester, Shaul G. Massry, and August Heidland*..... S-1

The role of nutrition in hypertrophy of renal tissue. *Leon G. Fine* S-2

Renal fuel utilization, energy requirements, and function. *Patricio Silva* S-9

Regulation of renal hemodynamics by plasma amino acid and hormone concentrations. *Pietro Castellino, William Hunt, and Ralph A. DeFronzo* S-15

Effects of growth hormone on GFR and renal plasma flow in man. *Raimund Hirschberg and Joel D. Kopple* S-21

Effects of acute protein loads of different sources on glomerular filtration rate. *Michel Dhaene, Jean-Pierre Sabot, Yvan Philippart, Jean-Marc Doutrelepont, and Jean-Louis Vanherweghem* S-25

Effects of an oral protein load on glomerular filtration rate in patients with solitary kidneys. *Carlo Rugiu, Lamberto Oldrizzi, and Giuseppe Maschio* S-29

No rise in glomerular filtration rate after protein loading in cirrhotics. *Max Dratwa, Alain Burette, Marc Van Gossum, Frédéric Collart, Robert Wens, Luc Charlier, Christian Tielemans, and Michel Deltenre* S-32

Factors that may retard the progression of renal disease. *Saulo Klahr, Mabel L. Purkerson, and Michael Heifets* S-35

The roles of eicosanoids in experimental glomerulonephritis. *M.A. Rahman, J.E. Stork, and Michael J. Dunn* S-40

Factors affecting progression of renal failure in patients on long-term dietary protein restriction. *Giuseppe Maschio, Lamberto Oldrizzi, Carlo Rugiu, Enrico Valvo, Antonio Lupo, Carmelo Loschiavo, Nicola Tessitore, Antonia Fabris, Linda Gammaro, and Giovanni Panzetta*..... S-49

Effect of control of diabetes mellitus on progression of renal failure. *Christoph Hasslacher and Eberhard Ritz*..... S-53

Possible role of the thick ascending limb and of the urine concentrating mechanism in the protein-induced increase in GFR and kidney mass. *Nadine Bouby, Marie-Marcelle Trinh-Trang-Tan, Wilhelm Kriz, and Lise Bankir* S-57

Protein diet and uremic toxicity: Myth or reality? *Claire Kleinknecht, Denise Laouari, Didier Thorel, Catherine Dodu, Bernard Gouget, Edouard Nalbandian, and Michel Broyer* S-62

Comparison of ketoacids and low protein diet on advanced chronic renal failure progression. *P. Jungers, Ph. Chauveau, Françoise Ployard, B. Lebkiri, C. Ciancioni, and N. K. Man*..... S-67

Amino acid hyperalimentation in acute renal failure: A potential therapeutic paradox. *Richard A. Zager* S-72

Dietary protein prior to renal ischemia and postischemic kidney function. *Peter M. Andrews and Sally B. Bates*..... S-76

Regulation of protein catabolism. *Farook Jahoor and Robert R. Wolfe*..... S-81

Proteases and other catabolic factors in renal failure. *August Heidland, Joachim Weipert, Roland M. Schaefer, Ekkehart Heidbreder, Gernot Peter, and Walter H. Hörl* S-94

Leukocyte proteinases and proteinase inhibitors in the catabolism of acute renal failure. *Roland M. Schaefer, August Heidland, and Walter H. Hörl* S-100

Influence of insulin resistance and amino acid supply on muscle protein turnover in uremia. *William E. Mitch, Robert C. May, Andrew S. Clark, Bradley J. Maroni, and Ralph A. Kelly*..... S-104

Insulin metabolism in acute renal failure. *Bruno Cianciaruso, Luigi Saccà, Vincenzo Terracciano, Fortuna Marcuccio, Giuseppe Orofino, Antonio Petrone, Vittorio E. Andreucci, and Joel D. Kopple* S-109

Glycerol-induced acute renal failure in the rat: Protection by exercise. *Rainer Plass, Roland M. Schaefer, August Heidland, and Walter H. Hörl* S-113

Contents continued on next page

Carnitine metabolism in chronic renal failure. *G. Guarnieri, G. Toigo, L. Crapesi, R. Situlin, M. A. Del Bianco, M. Corsi, P. LoGreco, G. Paviotti, G. Mioni, and L. Campanacci* S-116

Plasma levels of the carnitine precursor 6-N-Trimethyllysine and maintenance hemodialysis. *Klaus P. Kohse, Theo A. Graser, Peter Fürst, and Hans E. Franz* S-128

Carnitine metabolism in patients with chronic renal failure: Effect of L-carnitine supplementation. *Christoph Wanner, Sabine Förstner-Wanner, Claudia Rössle, Peter Fürst, Peter Schollmeyer, and Walter H. Hörl* S-132

Protein synthesis, cellular amino acids, and energy levels in CAPD patients. *Jack Metcoff, James Pederson, James Gable, III, and F. Llach* S-136

Abnormal fatty acid utilization during prolonged fasting in chronic uremia. *Edmond S. Ricanati, Kou-Yi Tserng, and Charles L. Hoppel* S-145

Seroconversion rate, hepatitis B vaccination, hemodialysis, and zinc supplementation. *Peter Rawer, W. R. Willems, Th. Breidenbach, W. Guttmann, W. Pabst, and G. Schütterle* S-149

Effect of the restriction of nitrogen intake on muscle protein synthesis in experimental uremic rats. *Masamitsu Fujii, Akio Ando, Hiroshi Mikami, Akira Okada, Enyu Imai, Yukifumi Kokuba, Atsushi Yamauchi, Yoshimasa Orita, Takenobu Kamada, and Hiroshi Abe* S-153

Nutritional and metabolic modulation of the carcinogen nitrosodimethylamine in chronic renal failure. *Pramod S. Lele, Stephen R. Dunn, and Michael L. Simenhoff* S-159

The effects of vitamin B-6 deficiency in chronically azotemic and sham-operated rats. *Marsha Wolfson and Joel D. Kopple* S-162

Nutritional hemodialysis. *Eben I. Feinstein* S-167

Controlled Trial of two keto acid supplements on renal function, nutritional status, and bone metabolism in uremic patients. *Edgar Meisinger and Manfred Strauch* S-170

Increase of body mass during long-term bicarbonate hemodialysis. *Günter Seyffart, Alfred Ensminger, and Rainhardt Scholz* S-174

Statistical selection of nutritional parameters in hemodialyzed patients. *Noël Cano, Jean P. Fernandez, Pierre Lacombe, Michel Lankester, Sylvain Pascal, Michel Defayolle, Jacques Labastie, and Serge Saingra* S-178

Abnormal amino acid metabolism after amino acid ingestion in chronic renal failure. *Alberto Tizianello, Giacomo Deferrari, Giacomo Garibotto, Cristina Robaudo, Stefano Saffioti, Gennaro Salvidio, and Ernesto Paoletti* S-181

Conversion efficiency of two branched-chain α ketoanalogs in normal and uremic rats. *Denise Laouari, Francis Rocchiccioli, Catherine Dodu, Claire Kleinknecht, and Michel Broyer* S-186

Sulfur amino acids in maintenance hemodialysis patients. *Stewart A. Laidlaw, Lori A. Smolin, Warren D. Davidson, and Joel D. Kopple* S-191

Influence of increased plasma ammonium levels on the ratio of plasma to erythrocyte amino acids. *Henri A. Jahn, D. C. Schohn, R. L. Schmitt, C. Koehl, R. Zawislak, and A. Frick* S-197

Relationship of nutritional status to erythrocyte insulin receptors in adults and children with uremia. *W.C. Arnold, D.E. Hill, and M. Boughter* S-202

Glucose metabolism in children with uremia: Effect of dietary phosphate and protein. *Robert H.K. Mak, Charles Turner, Thea Thompson, George Haycock, and Cyril Chantler* S-206

Circulating maltose and isomaltose in chronic renal failure. *Chandra D. Mistry, John E. Fox, Netar P. Mallick, and Ram Gokal* S-210

Prevention of phosphate retention and hyperphosphatemia in uremia. *Gavril Hercz and Jack W. Coburn* S-215

Renal and hepatic uptake of biologically active intact parathyroid hormone. *Ekkehart Heidbreder, Rüdiger Götz, Klaus Schafferhans, and August Heidland* S-221

Parathyroid-vitamin D axis in critically ill patients with unexplained hypocalcemia. *Tusar K. Desai, Richard W. Carlson, and Michael A. Geheb* S-225

Role of active oxygen on methylguanidine synthesis in isolated rate hepatocytes. *Kazumasa Aoyagi, Sohji Nagase, Mitsuharu Narita, and Shizuo Tojo* S-229

Sodium sensitivity and resistance of blood pressure: The role of the kidney and the renin-aldosterone axis. *Friedrich C. Luft and Myron H. Weinberger* S-234

The influence of potassium on blood pressure. *Richard L. Tannen* S-242

Ca^{2+} Defects in experimental hypertension: SHR's renal response to chronic infusion of human PTH (1-34). *David A. McCarron, Robert J. Shneidman, and David M. Lee* S-249

Mechanisms of hypertension in obesity. *Leslie P. Dornfeld, Morton H. Maxwell, Abraham Waks, and Michael Tuck* S-254

Table of contents

EDITORIAL REVIEW

Thyroid hormones and renal transport: Cellular and biochemical aspects. *Giovambattista Capasso, Natale G. De Santo, and Rolf Kinne* 443

LABORATORY INVESTIGATION

Extracorporeal enzymatic heparin removal: Use in a sheep dialysis model. *Howard Bernstein, Victor C. Yang, Dennis Lund, Mohinder Randhawa, William Harmon, and Robert Langer* . 452

Glucocorticoids modulate renal glucocorticoid receptors and Na-K ATPase activity. *Demetrius Ellis, Tran Dang Sothi, and Ellis D. Avner* 464

Regulation of papillary plasma flow by angiotensin II. *Pierre F. Faubert, Shyan-Yih Chou, and Jerome G. Porush, with the technical assistance of Richard Byrd*..... 472

Protective effect of prostacyclin on postischemic acute renal failure in the rat. *William F. Finn, Lawrence J. Hak, and Steven H. Grossman*..... 479

Intrarenal hypertonic saline infusions in dogs with thoracic caval constriction. *Hugo TH. Heidemann, Edwin K. Jackson, John F. Gerkens, and Robert A. Branch* 488

Effect of atrial natriuretic factor on renin release in isolated afferent arterioles. *Sadayoshi Itoh, Keishi Abe, Noboru Nushiro, Ken Omata, Minoru Yasujima, and Kaoru Yoshinaga* 493

Maturation of the developing renal glomerulus with respect to basement membrane proteoglycans. *Brigitte Lelongt, Hirofumi Makino, and Yashpal S. Kanwar*..... 498

Role of renal endopeptidase 24.11 in kinin metabolism in vitro and in vivo. *Nobuyuki Ura, Oscar A. Carretero, and Ervin G. Erdös* 507

Quantitative and qualitative studies of antibody–induced mesangial cell damage in the rat. *Tadashi Yamamoto and Curtis B. Wilson* 514

CLINICAL INVESTIGATION

Dynamics of erythropoiesis following renal transplantation. *Anatole Besarab, Jaime Caro, Bruce E. Jarrell, George Francos, and Allan J. Erslev*..... 526

Site of the action of a synthetic atrial natriuretic peptide evaluated in humans. *Jérôme Biollaz, Jacques Bidiville, Jacques Diézi, Bernard Waeber, Jürg Nussberger, Françoise Brunner–Ferber, Hector J. Gomez, and Hans R. Brunner*..... 537

Characterization of cationic albumin in minimal change nephropathy. *Gian Marco Ghiggeri, Fabrizio Ginevri, Giovanni Candiano, Roberta Oleggini, Francesco Perfumo, Carlo Queirolo, and Rosanna Gusmano*..... 547

Plasma levels and dialysance of atrial natriuretic peptide in terminal renal failure. *Hermann Saxenhofer, Markus P. Gnädinger, Peter Wiedmann, Sidney Shaw, Dominique Schohn, Christophe Hess, Dominik E. Uehlinger, and Henry Jahn* 554

Solute transport in continuous hemodialysis: A new treatment for acute renal failure. *Miles H. Sigler and Brendan P. Teehan, with the technical assistance of Denise Van Valkenburgh* .. 562

Comparison of loop diuretics in patients with chronic renal insufficiency. *James R. Voelker, Debbie Cartwright–Brown, Shirley Anderson, Jeff Leinfelder, Domenic A. Sica, Juha P. Kokko, and D. Craig Brater*..... 572

Contents continued on next page

A controlled trial of cyclophosphamide in patients with membranous glomerulonephritis. *Michael L. West, Kailash K. Jindal, Robert A. Bear, and Marc B. Goldstein* 579

Mesangial changes in IgA nephropathy in children. *Norishige Yoshikawa, Kazumoto Iijima, Kooji Maehara, Shoichi Yoshiara, Kunihiko Yoshiya, Tamotsu Matsuo, and Satoshi Okada* 585

EDITORIAL REVIEW

β_2-microglobulin: Its significance in the evaluation of renal function. *Gus H.C. Schardijn and L.W. Statius van Eps* 635

LABORATORY INVESTIGATION

Induction, characterization, and cell transfer of autoimmune tubulointerstitial nephritis. *Kym M. Bannister, Thomas R. Ulich, and Curtis B. Wilson* 642

The influence of concomitant experimental hypertension and glomerulonephritis. *Roland C. Blantz, Francis Gabbai, Leslie C. Gushwa, and Curtis B. Wilson* 652

Non-enzymatic glycation and altered renal structure and function in the diabetic rat. *Kenneth R. Copeland, Randall W. Yatscoff, James A. Thliveris, Adi Mehta, and Brian Penner* 664

Exacerbation of chronic aminonucleoside nephrosis by dietary cholesterol supplementation. *Jonathan R. Diamond and Morris J. Karnovsky* 671

Response to intraperitoneal *Staphylococcus epidermidis* challenge in renal failure mice. *Barbara Gallimore, Raymonde F. Gagnon, and Geoffrey K. Richards* 678

Ontogenesis of angiotensin-I converting enzyme in human kidney. *Françoise Mounier, Nicole Hinglais, Mireille Sich, Françoise Gros, Mireille Lacoste, Yves Deris, François Alhenc-Gelas, and Marie-Claire Gubler* 684

The enhancement of aminonucleoside nephrosis by the co-administration of protamine. *Takao Saito, Eric Sumithran, Eric F. Glasgow, and Robert C. Atkins* 691

Effects of dietary fish oil on renal insufficiency in rats with subtotal nephrectomy. *Linda A. Scharschmidt, Nora B. Gibbons, Laura McGarry, Paul Berger, Michael Axelrod, Rosamond Janis, and Young H. Ko* 700

CLINICAL INVESTIGATION

Residual renal function in hemodialysis patients may protect against hyperaluminemia. *Paul Altmann, Keith C. Butter, David Plowman, D. Mark Chaput de Saintonge, John Cunningham, and Frank P. Marsh* 710

Acute adaptative changes to unilateral nephrectomy in humans. *Angel Argiles, Georges Mourad, Nicole Basset, Claude Axelrud-Cavadore, Jacques Haiech, Charles Mion, Jean Claude Cavadore, and Jacques G. Demaille* 714

Renal handling of urea in subjects with persistent azotemia and normal renal function. *Giuseppe Conte, Antonio Dal Canton, Maurizio Terribile, Bruno Cianciaruso, Giovanni Di Minno, Mario Pannain, Domenico Russo, and Vittorio E. Andreucci* 721

Arterial hypotension in chronic hemodialyzed patients. *Anton E. Daul, Xiao L. Wang, Martin C. Michel, and Otto-Erich Brodde* 728

Observations of glomerular epithelial cell structure in patients with type I diabetes mellitus. *Eileen N. Ellis, Michael W. Steffes, Blanche Chavers, and S. Michael Mauer* 736

Alterations of glomerular podocytic processes in immunologically mediated glomerular disorders. *Jochen W.U. Fries, Hans-Joachim Rumpelt, and Wolfgang Thoenes* 742

Reduced glomerular filtration rate and hypercalciuria in primary struvite nephrolithiasis. *Cynthia Kristensen, Joan H. Parks, Marshall Lindheimer, and Fredric L. Coe* 749

Contents continued on next page

Effects of L-carnitine on sodium transport in erythrocytes from dialyzed uremic patients. *Walter D. Labonia, Oscar H. Morelli, Jr., Maria I. Gimenez, Patricia V. Freuler, and Oscar H. Morelli* 754

NEPHROLOGY FORUM

Calcium-regulating hormones and the kidney. *Kiyoshi Kurokawa* 760

Table of contents

EDITORIAL REVIEW

Molecular properties of amiloride action and of its Na^+ transporting targets. *Christian Frelin, Paul Vigne, Pascal Barbry, and Michel Lazdunski* 785

LABORATORY INVESTIGATION

Converting enzyme inhibition and progressive glomerulosclerosis in the rat. *Joke J. B. Beukers, Annemieke van der Wal, Philip J. Hoedemaeker, and Jan J. Weening* 794

Role of 1,25-dihydroxyvitamin D on the skeletal resistance to parathyroid hormone. *Tilde Galceran, Kevin J. Martin, Jeremiah J. Morrissey, and Eduardo Slatopolsky* 801

Acidosis, not azotemia, stimulates branched-chain, amino acid catabolism in uremic rats. *Yoko Hara, Robert C. May, Ralph A. Kelly, and William E. Mitch* 808

Exercise training ameliorates progressive renal disease in rats with subtotal nephrectomy. *Michael Heifets, Teresa A. Davis, Elise Tegtmeyer, and Saulo Klahr* 815

Enhanced gastrointestinal absorption of aluminum in uremic rats. *Thomas H. Ittel, Bruce Buddington, Nancy L. Miller, and Allen C. Alfrey* 821

Glomerulosclerosis and renal cysts in mice transgenic for the early region of SV40. *Karen MacKay, Liliane J. Striker, Carl A. Pinkert, Ralph L. Brinster, and Gary E. Striker* 827

Complement activation in experimental IgA nephropathy: An antigen-mediated process. *Abdalla Rifai, Ann Chen, and Hirokazu Imai* 838

Captopril inhibits the hydroosmotic effect of ADH in the cortical collecting tubule. *Diane Rouse, William Dalmeida, Frank C. Williamson, and Wadi N. Suki* 845

Human Bence Jones protein toxicity in rat proximal tubule epithelium in vivo. *Paul W. Sanders, Guillermo A. Herrera, and John H. Galla, with the technical assistance of James R. Hancock and Robert L. Lott* 851

Localization and characterization of renal calcitonin receptors by in vitro autoradiography. *Patrick M. Sexton, William R. Adam, Jane M. Moseley, T. John Martin, and Frederick A. O. Mendelsohn* . 862

CLINICAL INVESTIGATION

T-cells and macrophages in rapidly progressive glomerulonephritis: Clinicopathologic correlations. *W. Kline Bolton, Donald J. Innes, Jr., Benjamin C. Sturgill, and Donald L. Kaiser* 869

Metabolic response to exercise in dialysis patients. *Pietro Castellino, Margaret Bia, and Ralph A. DeFronzo* 877

Trimethoprim-sulfamethoxazole in cyst fluid from autosomal dominant polycystic kidneys. *Lawrence W. Elzinga, Thomas A. Golper, Abdel L. Rashad, Mary E. Carr, and William M. Bennett* 884

Cyclosporine A enhances platelet aggregation. *Andrew A. Grace, Manuel A. Barradas, Dimitri P. Mikhailidis, Jamie Y. Jeremy, John F. Moorhead, Paul Sweny, and Paresh Dandona* 889

Hyperglycemia with and without glycosuria: Effect on inulin and para-amino hippurate clearance. *Stephen A. Greene, R. Neil Dalton, Charles Turner, George B. Haycock, and Cyril Chantler* 896

Contents continued on next page

Secondary hyperparathyroidism and cardiac hypertrophy in hemodialysis patients. *Gérard M. London, Marie-Christine De Vernejoul, Françoise Fabiani, Sylvain J. Marchais, Alain P. Guerin, Fabien Metivier, Alena M. London, and Francisco Llach* 900

Effect of blood cooling on cuprophan-induced anaphylatoxin generation. *Quirino Maggiore, Giuseppe Enia, Carlo Catalano, Valerio Misefari, and Antonino Mundo* 908

NEPHROLOGY FORUM

Vitamin D and the kidney. *Michael F. Holick* 912

TECHNICAL NOTE

Estimation of mean glomerular volume in patients with insulin-dependent diabetes mellitus. *Rudolf W. Bilous, S. Michael Mauer, John M. Basgen, and Michael W. Steffes* 930

Forefronts in Nephrology: Molecular Biology and the Kidney

A symposium sponsored by the International Society of Nephrology and the National Institute of Diabetes and Digestive and Kidney Diseases

September 14–17, 1986, Pinehurst, North Carolina, USA

Table of contents

Introduction. *Harry R. Jacobson, Daryl K. Granner, and Roscoe R. Robinson* S-1

Structure and function of the β_2-adrenergic receptor—homology with rhodopsin. *Henrik G. Dohlman, Marc G. Caron, and Robert J. Lefkowitz* S-2

Discussion: Dohlman et al, β_2-adrenergic receptor structure and function. *Discussion Leader: Jay H. Stein. Discussants: Thomas P. Dousa, Barbara J. Ballerman, Dennis A. Ausiello, Lutz Birnbaumer, Kenneth E. Bernstein, Jesse Roth, Carl L. Skorecki, and Robert W. Schrier* ... S-8

Signal transduction by G proteins. *Lutz Birnbaumer, Juan Codina, Rafael Mattera, Atsuko Yatani, Nancy Scherer, María-José Toro, and Arthur M. Brown* S-14

Discussion: Birnbaumer et al, Signal transduction. *Discussion Leader: Robert W. Schrier. Discussants: Tomas Berl, Bertram Sacktor, Robert J. Lefkowitz, Carl L. Skorecki, Detlef O. Schlondorff, George E. Schreiner, Jr., and Jesse Roth* S-38

Vasopressin-sensitive adenylate cyclase: Subunit interactions assessed by target analysis and computer modelling. *Dennis A. Ausiello, A.S. Verkman, and Karl L. Skorecki* S-43

Discussion: Ausiello et al, Subunit interactions. *Discussion Leader: Gerhard H. Giebisch. Discussants: Alan Verkman, Carl L. Skorecki, Harry R. Jacobson, Robert J. Lefkowitz, Lutz Birnbaumer, Jesse Roth, Bliss Forbush III, Thomas P. Dousa, Seth L. Alper, and Sandra K. Masur* S-51

Hormone receptor interactions: An overview. *Jesse Roth, Maxine Lesniak, and Joanna M. Hill* S-56

Discussion: Roth et al, Hormone receptor interactions. *Discussion Leader: Barry M. Brenner. Discussants: Robert W. Schrier, Gary E. Striker, Dennis Brown, Ralph Rabkin, Rex L. Jamison, Marc R. Hammerman, Julian L. Seifter, Thomas O. Daniel, Carl L. Skorecki, and Leon G. Fine* ... S-61

Calcium signalling in cells—molecular mechanisms. *John H. Exton* S-68

Discussion: Exton, Calcium signalling mechanisms in cells. *Discussion Leader: Saulo Klahr. Discussants: Robert W. Schrier, Hermann Haller, John B. Stokes, Jesse Roth, Carl L. Skorecki, Harlan E. Ives, L. Gabriel Navar, Edward J. Weinman, Lutz Birnbaumer, Karl J. Ullrich, Keith A. Hruska, and Marc R. Hammerman* S-77

The molecular biology of insulin action on protein synthesis. *Daryl K. Granner* S-82

Discussion: Granner, Insulin and gene transcription. *Discussion Leader: Joseph S. Handler. Discussants: Kenneth E. Bernstein, Thomas P. Dousa, Isidore Edelman, Sandra K. Masur, Allan S. Pollack, and Seth L. Alper* S-94

Regulation of the sodium pump in excitable cells. *Douglas M. Fambrough, Barry A. Wolitzky, Michael M. Tamkun, and Kunio Takeyasu* S-97

Discussion: Fambrough et al, Sodium pump regulation. *Discussion Leader: Maurice B. Burg. Discussants: Stanley G. Schultz, Thomas O. Daniel, Alicia McDonough, Isidore Edelman, Bernard Rossier, and Bliss Forbush III* S-113

A molecular biological approach to the study of anion transport. *Seth L. Alper, Ron R. Kopito, and Harvey F. Lodish* S-117

Discussion: Alper et al, Molecular biology of anion transport. *Discussion Leader: David G. Warnock. Discussants: George J. Schwartz, Victor L. Schuster, Robert Bacallao, Kenneth E. Bernstein, Marilyn G. Farquhar, Jesse Roth, George Palade, and Dennis Brown* S-129

Na,K,Cl-cotransport system: Characterization by bumetanide binding and photolabelling. *Mark Haas and Bliss Forbush III* S-134

Discussion: Haas and Forbush III: Na,K,Cl-cotransport system. *Discussion Leader: Thomas E. Andreoli. Discussants: Franklin H. Epstein, David G. Warnock, Heini Murer, Lutz Birnbaumer, Seth L. Alper, Helmut G. Rennke, Thomas P. Dousa, John H. Dirks, William B. Guggino, and W. Brian Reeves* S-141

Contents continued on next page

Genetic approach to structure, function, and regulation of the Na^+/H^+ antiporter. *Jacques Pouysségur, Arlette Franchi, Gilles L'Allemain, Isabelle Magnaldo, Sonia Paris, and Claude Sardet* S-144

Discussion: Pouysségur et al, Genetic approach to the Na^+/H^+ antiporter. *Discussion Leader: Peter S. Aronson. Discussants: Leon G. Fine, Harlan E. Ives, Tomas Berl, David G. Warnock, Carl L. Skorecki, Dennis A. Ausiello, Edward A. Adelberg, Thomas O. Daniel, Thomas P. Dousa, Robert Bacallao, Peter Igarashi, and Edward J. Weinman* S-150

The study of natural and synthetic mutations in the LDL receptor. *David W. Russell* S-156

Discussion: Russell, Mutations in the LDL receptor. *Discussion Leader: Qais Alawqati. Discussants: Dennis A. Ausiello, Kenneth E. Bernstein, Daryl K. Granner, George Palade, Robert Bacallao, Thomas O. Daniel, Dennis Brown, Sandra K. Masur, George J. Schwartz, and Helmut G. Rennke.* S-162

Membrane receptors that mediate glycoprotein endocytosis: Structure and biosynthesis. *Kurt Drickamer* S-167

Discussion: Drickamer, Membrane receptors for endocytosis of glycoproteins. *Discussion Leader: Floyd C. Rector. Discussants: Robert Bacallao, Harlan E. Ives, Seth L. Alper, Thomas O. Daniel, Rex L. Jamison, George F. Schreiner, Jr., Thomas P. Dousa, and Jesse Roth.* S-181

Molecular sorting during endocytosis. *Ira Mellman* S-184

Discussion: Mellman, Molecular sorting during endocytosis. *Discussion Leader: Darrell D. Fanestil. Discussants: Floyd C. Rector, Jr., Dennis K. Stone, Ralph Rabkin, Alicia McDonough, Dennis A. Ausiello, David G. Warnock, Joseph S. Handler, and Sandra K. Masur.* S-196

Membrane traffic in an epithelial cell line derived from the dog kidney. *Kai Simons* S-201

Discussion: Simons, Membrane traffic in MDCK cells. *Discussion Leader: Rex L. Jamison. Discussants: Marc R. Hammerman, Kiyoshi Kurokawa, Joseph S. Handler, John B. Stokes, Dennis Brown, Robert W. Schrier, John Brown, Dennis A. Ausiello, Thomas P. Dousa, Sandra K. Masur, and Michael S. Goligorsky* S-208
